The Interreg-Med InCircle Project aims to enhance the sustainability and attractiveness of MED touristic insular and low-density areas through circular tourism, preserving the quality of natural resources and improving the quality of life of residents and tourists.

Eleven MED territories developed strategies aiming at their transition towards a more circular tourism by applying the InCircle tools, which have helped to assess the current circularity status of each territory, establish a working framework, develop successful participatory processes to contribute to the strategy and evaluate the resulting strategies.

In addition, the project has implemented 5 big-scale and 6 small pilot actions that have brought to each territory tangible good-practices to walk towards a common objective of increasing circularity and sustainability of touristic activities.

**Final event:**

**Morning session:** dedicated to assess the current status of Mediterranean Tourism. This session will bring in the point of view of experts and the experience of different territories on which are the challenges, bottlenecks and opportunities to increase the circularity and sustainability of the territories. Participants will learn how can InCircle tools help them to reach this objective.

**Afternoon workshop:** will consist on a highly-interactive working group session that will bring together territories (provincial, counties, city councils, regions or others), with technicians and experts on sustainable tourism, which after learning which funding opportunities for sustainable tourism projects are available, will work together in the “ProCIRCLE laboratory” to design new solutions, good practices and projects for a circular Mediterranean tourism.
**Agenda**

9:30 **Registration**

10:00 **Welcoming Speech.** MedCities (Josep Canals)
**Opening.** Area Science Park (Fabio Tomasi)

**Morning session:** Sustainable Tourism in the Mediterranean: current situation and circularity increase

10:15 **KEYNOTE SPEECH. Sustainable tourism in the Mediterranean. Main bottlenecks and opportunities.** NECSTouR (Thomas Guillot)

10:35 **Challenges and opportunities of Mediterranean touristic territories.**
Representatives of touristic territories from across the Mediterranean

11:40 **Coffee Break**

12:00 **InCircle approach as a solution.** Area Science Park (Fabio Tomasi)

12:10 **Overview of InCircle tools**
- **Operational model** Area Science Park (Enrico Longato); Larnaca Famagusta District Development Agency (Dr. Eudokia Balamou)
- **Participatory process toolkit** Area Science Park (Andrea Bincoletto); Govern de les Illes Balears (Margalida Picornell)
- **Strategy Evaluation Toolkit** Energy and Water Agency (Julia Bonello); Albanian Institute of Transport (Florjan Xhelilaj)
- **Circular Tourism Tools** Scuola Superiore Sant'Anna (Serena Carlesi); Parc Natural del Delta de l'Ebre (Xavi Abril)

12:50 **InCircle Policy Brief and way forward.** Area Science Park (Fabrizia Salvi)

13:30 **Lunch**

**Afternoon Workshop:** Sustainable tourism projects funding and seedlings

14:45 **Funding opportunities for sustainable tourism projects.** Diputació de Barcelona (Josep Rodriguez)

15:15 **ProCIRCLE Laboratory: Working groups for the design of new solutions and trajectories for a circular Mediterranean Tourism**

17:10 **Meeting conclusions**

17:30 **Event closure**

**Networking aperitif**
