About us

ProcuraMED project was born aiming to support the transition towards competitive, innovative, sustainable and resilient ecosystems in the Mediterranean area, developing innovation capacities of enterprises and local authorities and the uptake of advanced green technologies, by means of Strategic Procurement Procedures.

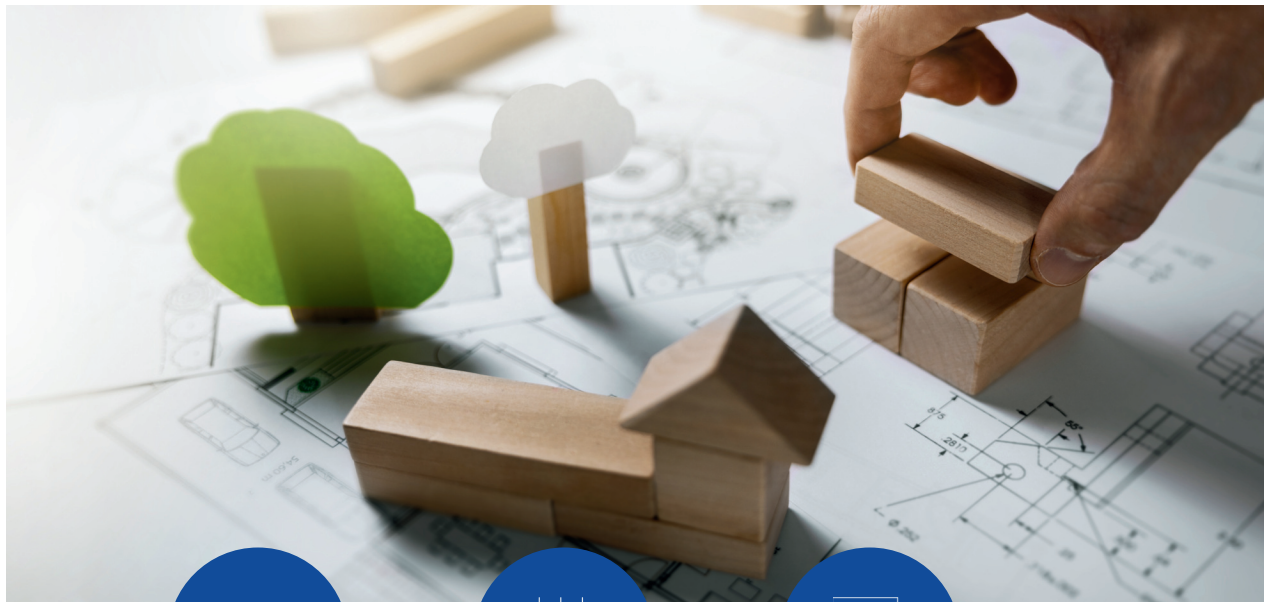

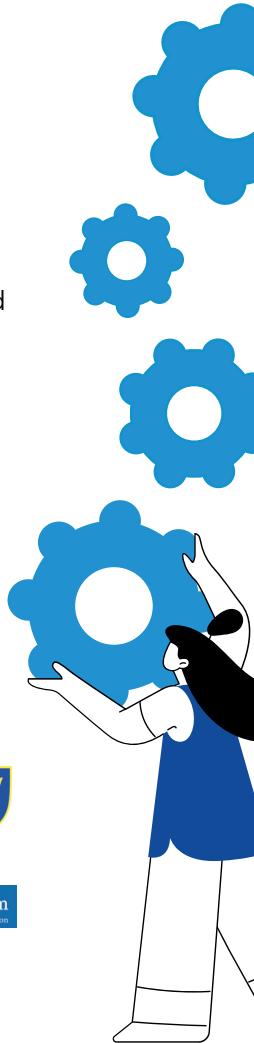

The European Commission identified Strategic Procurement as a pillar for orienting European growth, towards an Innovative sustainable economy. ProcuraMED aims to accelerate technology transfer of green innovation, through the application of Green Public Procurement and Public Procurement of Innovative solutions, in the Mediterranean area.

Local, regional and national public authorities, alongside with SME, business support organisations, research institutions, and sectoral agencies, will enhance their expertise in strategic procurement procedures and adopt new specialised tools, through ProcuraMED's awareness-raising, capacity building, skill development, and knowledge transfer activities.

ProcuraMED key outputs

are the Strategic Procurement Unified Platform and the Euro-Mediterranean coalition for Innovative sustainable economy, both thought to have a widespread transferability to all the public procurers and enterprises of the territories of the EuroMed cooperation area territories.
